

TerraWave Solutions® Cable Assemblies Catalog

TWS-100, TWS-195, TWS-400 and TWS-600 Cable Assemblies

Complete Reference Guide

TerraWave offers a vast selection of custom-built cable assemblies for TWS-100, 195, 400 and 600 series cable. Choose from over 300 high quality, pre-built cable assemblies and popular connector types at an outstanding value. This Cable Assemblies catalog is a handy quick reference guide and also includes an access point (AP) to connector key that outlines most major AP manufacturers' connector types and the corresponding connector needed for the AP.

When customers purchase cable assemblies through TerraWave, they can be certain they are purchasing product of the highest quality AND value. TerraWave technicians put each cable assembly through a series of rigorous tests to ensure each cable assembly meets TerraWave's stringent quality standards.

These tests include:

- >> **A Pin Depth Test:** Determines if the pin depth in relation to the body is installed to the proper height
- >> **A Sweep Test:** Tests the pattern of electricity going through the jumper to determine accurate connection
- >> **A Pull (and Twist) Test:** A physical pull and twist test to ensure the connector will stay attached to the cable

Once the testing is complete, heat shrink is applied and fitted to the cable and connector, providing electrical insulation and protection from dust and solvents. Every TerraWave cable assembly includes a one-year warranty. Contact a TerraWave account manager at 800-472-7373 or sales@terrawave.com for additional information.
